Elliot Miller

734-223-7401 | Website | elliotgrantmiller@gmail.com | linkedin.com/in/elliotgmiller | github.com/elliotmiller18

EDUCATION

University of Michigan

Ann Arbor, MI

Bachelor of Computer Science

Expected May 2027

• Relevant Coursework: Formal Verification of Distributed Systems, Operating Systems, Web Systems, Computer Organization, Data Structures and Algorithms, Computer Theory, Compilers, Game Development, Programming Languages

EXPERIENCE

Software Developer (Rust)

Jan 2026 – May 2026

 $N1 \rightarrow Founder's Fund$

New York, NY

• Incoming Software Engineering intern where my primary roles will be maintining a TypeScript targeting compiler and writing low-level networking code.

Backend Developer (Typescript)

May 2025 – August 2025

Wise Pelican

Phoenix, AZ

- Wrote a from-scratch fast JPEG metadata decoder, cutting off over 95% of runtime from the previous implementation by reducing data needed to process per JPEG from MegaBytes to a single KiloByte
- Decreased average runtime of PDF rendering engine from 10s to 2s by moving image generation to an asynchronous model, allowing smaller requests to be processed, generated, and responded to in the time that larger PDFs were rendering

PROJECTS

GameBoy Emulator (C++) Github

- Simulated all GameBoy-specific hardware components/systems, including internal clock circuits, interrupts, and proprietary graphics
- Wrote a fully accurate Z80 Sharp CPU simulator to run ROMs including sub-instruction timing, hardware bugs, and a pipeline simulator
- Achieved consistent a consistent 300 frames per second using a custom SDL-integrating renderer on an M1 Macbook with integrated graphics

Network File System (C++)

- Created a simulated file system similar to that of the Windows operating system with full crash consistency and atomicity of all write operations, as well as support kernel swap operations
- Allowed for remote read/writes using OS socket/port syscalls

Wordle Bot (Python) Github

- Created a Wordle algorithm using a mix of heuristics including frequency of words/characters in the English language, scoring words and sorting them by likelihood
- Achieves an average guess count of 3.36 over the last 2 years of words, compared to the human average of 3.97

MapReduce Implementation (Python)

- Created an efficient recreation of the MapReduce algorithm using a distributed systems setup
- Wrote communication protocols between the Manager and Worker servers

Miscellaneous

- Was ranked #3 on the Stack Overflow global leaderboards (see my website for proof)
- Volunteer at underprivileged schools to teach coding classes to elementary-aged kids

TECHNICAL SKILLS

Languages: C++, C, Rust, x86_64, Dafny, Java, Python, SQL, OCaml, C# Libraries/Frameworks: SDL.h, SQLite, PostgreSQL, AWS CDK/SDK, Unity Developer Tools:Git, AWS, AWS Lambdas, Docker, MacOS, Linux, NVim
